devices  
under  
support

**15,000+**  
customers  
**245+**  
Fortune 500  
companies

# Maintenance and Support Under One Contract

Third-party maintenance support on **Network, Server and Storage** reduces operating costs by **40-85%** while increasing flexibility. With **faster response times, flexible maintenance contracts, customized support solutions** and the **opportunity to extend your asset lifecycle**, trusting your maintenance needs to a third-party vendor **decreases capital expenditures** and **supports a smart IT strategy**.

## Network

Maintenance and support to provide flexible, full coverage, customized for your network needs.

## Server

Server maintenance solutions that span from complex, legacy servers down to industry standard (x86) servers.

## Storage

Comprehensive break/fix support, spanning most hardware platforms from leading manufacturers.

## why curvature?

- **800+ badged Field Engineers**
- Flexible service levels
- **Global Central Engineering** team provides development, training and Level 3 support
- Our **Remote Enterprise Management (REM)** tool delivers automated “service required” tickets directly to Curvature help-desk ensuring faster, more accurate problem resolution.
- Wholly-owned spare parts inventory (non-shared logistics) located around the globe in **100+ Service Centers**
- Continual hands-on technical training conducted in our **Centers of Excellence** on live gear
- Comprehensive **development** methodology to define support capabilities for all roadmap products, prior to support commitment
- **ClearView** to identify support risks and make maintenance strategy recommendations
- **singlePoint®** portal to track service activity and make contract changes
